

PRESS RELEASE

Energyminer GmbH Wins Munich Business Plan Competition

Munich, July 31, 2023: Energyminer GmbH has emerged victorious in this year's Munich Business Plan Competition, showcasing impressive achievements and accomplishments. After already securing the second place in Phase 2 of the competition and being placed among the top 10 in Phase 1, the company has now secured the first place in Phase 3.

The energy recovery solution that Energyminer has developed impressed the jury. The company is actively pushing the energy transition forward by producing affordable, base-load-capable clean electricity while ensuring the preservation of the natural river biotope and avoiding any hidden costs to society. Notably, Energyminer has showcased not only a pioneering innovation but also an exceptionally successful business model that contributes sustainably to the advancement of the energy transition.

Winning the Munich Business Plan Competition not only grants Energyminer recognition for their promising overall concept but also boosts visibility among potential investors, paving the way for them to realize their ambitious plans for the future.

For the founders of Energyminer GmbH, Georg Walder, and Richard Eckl this is not their first taste of success in the Munich Business Plan Competition. Back in 2015, they achieved the second-place position with their venture, INVENOX GmbH.

The business ideas of the other awardees and nominees of the Munich Business Plan Competition, such as Sedivention GmbH and baird GmbH, once again demonstrate the impressive potential and innovative strength of young companies in Bavaria. The Munich Business Plan Competition offers young companies the opportunity to present their innovative ideas to an experienced audience and receive valuable feedback from experts.

About the Munich Business Plan Competition:

The Munich Business Plan Competition (MBPW) provides a platform for innovative founders from all industries to receive professional feedback on their ideas at an early stage. For many investors, a good placement in MBPW is considered a seal of approval and a steppingstone for initial financing rounds. The competition has already awarded and recognized a variety of successful companies in their early stages, including well-known names like Flixbus and Magazino.

About Energyminer GmbH:

Energyminer GmbH is an emerging startup that has developed groundbreaking technology for harnessing kinetic energy from flowing water. Utilizing patented technologies and an innovative energy recovery concept, Energyminer enables the economic production of base-load-capable clean electricity without CO₂ emissions. The company is dedicated to making a sustainable impact on the energy transition and actively shaping the future of energy generation in an environmentally responsible manner.
